

Clear Demand Company Overview

Clear Demand is the leader in Intelligent Price Management and Optimization (IPMO) for retail. We were the first company to deliver an omni-channel lifecycle pricing solution that synchronizes prices, promotions, and markdowns online and in-store to produce a consistent brand and shopping experience. Clear Demand is the leading innovator in retail pricing solutions with patented science that analyzes historical sales to understand shoppers' sensitivity to price and generate price and promotion strategies that account for pricing rules, cost changes, and competitor prices to achieve profit and revenue goals. Architected on big data and delivered through Software-as-a-Service (SaaS), Clear Demand's Intelligent IPMO solution can be administered from a public or private cloud. Clear Demand's innovations in retail science simplify adoption and use, while allowing retailers to see value in just weeks with more transparency and minimal disruption to existing business.

Clear Demand offers a competitive salary with stock options and a benefits package, including medical, dental, 401k.

Job Description –Jr Product Manager/Product Manager

This is a full-time position with tremendous potential for growth. The successful candidate will be exceptionally talented and hardworking---a self-starter able to multi-task and deliver results in a fast-paced environment. We are looking for a collaborative team player with experience in product management, data analysis, problem solving, and quality assurance. The ideal candidate will have a proven track record showing commitment to and sense of urgency for project timelines. This position will report to the Vice President of Product Management.

Duties:

- Work closely with professional services, engineering, and science teams to translate business needs into detailed user stories and technical specifications.
- Collaborate with professional services and product teams to ensure that developed solutions meet business requirements and quality standards.
- Track KPI's for product performance and release success.
- Own the testing and quality assurance processes, including test planning, test case development, and documentation.
- Contribute to continuous improvement initiatives by providing insights and recommendations based on project experiences.
- Develop thorough understanding of product features and client and market needs
- Improve product documentation
- Support Road Map definition by utilizing knowledge of market, client, and product needs
- Work with clients, engineering, and professional services to troubleshoot client data anomalies by researching data in client input files, SQL and Mongo databases, and system output.

Required Skills:

- 1-3 years of work experience in product management, analytics, QA, or similar
- Must be comfortable in a fast-paced environment and multitasking

- Strong interpersonal and communication abilities
- Strong analytical, strategic and coordinating skills
- Proficiency in engaging with customers and delivering presentations
- High degree of personal initiative, learning ability and willingness to learn are a basic prerequisite

Education:

- Bachelor's degree required.
